FACULTY
Mr. Yonus A. Siddiqui is an independent supply chain consultant. He is qualified as MBA in marketing from IBA and Certified Supply Chain Manager (CSCM) from ISCEA, USA. Having worked for two decades with leading companies like Unilever, Engro Polymer, Continental Biscuits (Danone Group), and e2e Supply Chain (fastest growing company in Pakistan), Yonus has now started his own consultancy specializing in supply chain. An innovator in designing and aligning business processes and creating new systems from scratch, Yonus has successfully executed several greenfield logistics and cost cutting projects. He was awarded the Corporate Excellence Award in Engro Polymer for successful logistics project execution. He has been a visiting faculty member at IBA, a guest speaker at PIM and also has the distinction of being the founder of Supply Chain Association of Pakistan (SCAP) and its first President.

OVERVIEW
Thanks to globalization, faster product development and increasingly flexible manufacturing systems, an unprecedented number and variety of products are competing in the market ranging from apparel & toys to mobile phones and computers. Despite the benefits to consumers, this phenomenon is making it very difficult for manufacturers and retailers to predict and plan which of their goods will sell in the market. Variation of demand forecasts from actual sales is leading to significant losses to manufacturers and retailers alike.

This intensive 3 day program takes the participants on a journey of reviewing three best-in-class companies who were able to put the uncertainty genie in the bottle better than anyone else and achieved spectacular results. The journey ends on a climax where the participants login to the Harvard website for a 4 hour online global supply chain simulation to take key decisions themselves and see their impact on the company’s bottom line.

BENEFITS
✓ Understand best-in-class behavior and strategy for global supply chain management
✓ Have practical guide on how to improve forecast accuracy
✓ Learn exactly how a best in class company made its manufacturing more flexible to cater to demand variations with minimum disruption
✓ Understand and Appreciate the enabling power of IT in integrating the entire supply chain and to achieve fastest possible response to changing market scenarios
✓ Build supply chain complexity consciousness at the product design and development level to counter the development risks
✓ Able to fully grasp integrated thinking skills by playing hands on with the simulation game and observing the effects of their decisions on the bottom line.

Workshop on
Making Supply Meet Demand in an Uncertain World

With hands-on online SCM simulation game
