Rupee gains more strength as dollar slips to Rs159.98

to Ks159.98

KARACHI: Pakistani rupee continued gaining strengthen against the US dollar on Thursday and gained 38-paisa in its value in interbank.

The US dollar was traded at Rs159.98 against Rs160.36 on last trading day (Wednesday), according to a tweet of State Bank of Pakistan (SBP).

The recent increase in the local currency is mainly due to \$1.4 billion received from IMF and deferment in payments of foreign debt.

During the last four days, Pakistani rupee has been strengthened by Rs3.59 against the international currency. TLTP

Four more Larkana localities sealed to stop virus spread

LARKANA: After sharp increase LARKANA: After sharp increase in the local transmission of coronavirus cases in Larkana, four more localities of the city have been completely sealed by the local administration.

The areas of Ali Goharabad, Samiabad, Samiabad, Samtia Road and Kafla Sirai have been completely sealed after the number of coronavirus cases detection

cases detection.

Streets and the roads coming to the areas have been sealed by placing tents, while heavy contingents of the police have been deployed in the sealed areas to ensure complete lockdown

Mohallah and Bakrani are already completely sealed.

Nobody is allowed to visit the sealed areas, as the number of cases has jumped to 21 as compared to 14 yesterday.

Earlier, the Karachi's deputy commissioner had ordered the closure of 11 areas of the metropolis where new cases of coronavirus patients had been identified as Sindh's infected tally continues to surge.

Sindh Information and Local

Sindh Information and Local Government Minister Syed Nasir Hussain Shah had said not the complete UCs but only the affected localities in the District East would be under a It may be noted that three localities of the city Darri, Nawan complete lockdown.

According to the minister, a major issue would emerge in case an entire UC was sealed. He had said the East deputy commissioner had been asked by the Sindh government to take the corrective measures

measures.
Only those streets would be sealed where people affected from coronavirus were present, Shah clarified. He said sealing the entire UCs would create serious problems.

4590 patients have been tested positive for the epidemic in Punjab, 3373 in Sindh, 1453 in Khyber Pakhtunkhwa, 552 in Balochistan, 290 in Gilgit-Baltistan, 204 in Islamabad and 51 in Azad Kashmir. - NNI

Industries to be opened gradually: Chief Secretary Sindh

KARACHI: Chief Secretary Sindh Mumtaz Ali Shah said that Sindh Govt is cognizant about the economic impact of closure of factories and is committed to allow the indus-tries to function gradually. However, industrialists have to give an undertaking that all However, industrialists have to give an undertaking that all prescribed SOPs would be complied in letter and spirit as the government is seriously determined to control COVID-19. He was talking in meeting with Majyd Aziz, President Employers Federation of Pakistan, Khalid Junejo, Director, and Fasihul Karim Siddiqi, Secretary General in his office, says a Press release. Responding to the demand of EFP that the workers' wages

and salaries should be financed from the Workers Welfare Fund and SESSI reserves, the Chief Secretary, who was assisted by Additional Chief Secretary Home, Usman Chachar and Secretary Labor, Abdul Rasheed Solangi, understood the proposal and advised the Labor Secretary to discuss with Labor Minister Saced Ghani to immediately hold a meeting of the Boards of WWF and SESSI and to finalize modalities to either give interest-free loans or at least 50% subsidy from these funds. Muntaz Ali Shah in his response to the suggestion that utility bills from SSGC and KE and contributions to

KARACHI: Mumtaz Ali Shah, Chief Secretary Sindh met a delegation of Employers Federation of Pakistan (EFP) comprising Majyd Aziz, President, Khalid Junejo, Director, Fasihul Karim Siddiqi, Secretary General. Usman Chachar, Additional Chief Secretary Home & Abdul Rasheed Solangi, Secretary Labour are also seen in the meeting.

SESSI and EOBI be suspended for one year, assured the delegation that the Federal Govt would be contacted to facilitate the industries because it is a genuine demand when industries are facing a financial crunch.

"The limit of 55 years is only for workers and not for management personnel. He categorically disagreed with the demand that the Undertaking condition that employers have to sign should be withdrawn", Chief Secretary also informed.

Mr. Shah also agreed that SMEs must be fully supported to maintain their sustainability and save them from financial disaster. He said that the government has taken relevant

allow downstream industr of export-based enterprises function otherwise the expo based industries would no able to run without continu supply of accessories and material produced by the downstream industries.

material produced by the downstream industries.

Chief Secretary Sindh requested the employers to assist the government during this crisis and hoped that private sector would refrain from litigation in the larger national interest. He also assured that his office would henceforth regularly consult with EFP and appreciated the positive role of EFP during this crisis.

Amin directs USF to expedite fiber optics cable laying work

ISLAMABAD: Federal Minister for Information Technology and Telecommunication Syed Amin-ul-Haque Thursday directed Universal Service Fund (USF) to expedite work on projects of laying fiber optics cable.

Chief Executive Officer (CEO) Universal Service Fund (USF) Haaris Mahmood Chaudhry during a meeting also briefed the minister about the working and projects of the USF being carried out various parts of the USF being carried out various parts of the CEO apprised the minister that the USF had awarded contracts of eight projects in the current financial year so far for the provision of hi-speed broadband services in unserved areas of the country and the contract of two more projects would be awarded in the end of current financial year.

He said that in next financial year, contracts of 15 projects would be awarded for provision of mobile broadband and hispeed internet in unserved areas. Haq lauded the performance of Universal Service Fund and emphasized the need of maintaining transparency and merit while awarding contracts for providing broadband services. He also directed CEO USF to expedite the work on the projects of laying fiber optics cable. Meanwhile, MD Telecom Foundation (TF) Zooma Mohiuddin also called on the minister and briefed him about the working and projects of the TF.

minister and briefed him about the working and projects of the TF.

Managing Director National Telecommunication Corporation (NTC) Brig (Retd) Viqar Rashid Khan also met with the federal minister for IT and telecommunication. - TLTP

ICCI stands with govt in public welfare initiatives

ISLAMABAD: President Islamabad Chamber of Commerce & Industry (ICCI) Muhammad Ahmed Waheed Thursday said that business community is standing with the government in public welfare initiatives and ICCI would try to adopt one Panagah (shelter home) in Islamabad. He suggested that monthly accounts statements of Panagahs should be developed and a database of these Panagash should also be maintained. He said that ICCI in collaboration with local industry would try to provide jobs to skilled and other poor people living in Panagahs. He further said that ICCI in collaboration with its members is working to provide free ration to 2500 families affected by COVID-19 and added that it would also cooperate with government in this noble cause. Earlier, MNA Sajida Zulfiqar along with Reasmure Jahvan Piris Muister's Ecol

19 and added that it would also cooperate with government in this noble cause.

Earlier, MNA Sajida Zulfiqar along with Nascemur Rehman, Prime Minister's Focal Person for governmen's Panagah Program, and Salman Aftab, Chairman PTI Standing Committee on Accountability & Discipline,

visited Islamabad Chamber of Commerce & Industry and gave a detailed briefing to the business community on Panagah Program.

Speaking at the occasion, Sajida Zulfiqar said that the government wants to set up more Panagahs in the country for downtrodden people of society on public-private partnership basis to run these shelter homes on sustainable basis. She said that 40 percent population of the country is below poverty line and Prime Minister Imran Khan is determined to uplift their living standard as improving the lives of poor people was very close to his heart.

Speaking at the occasion, Naseemur Rehman said that 27 Panagahs are current-has planned to set up 100 more Panagahs in the country by the end of this year to provide shelter to poor people. He said that a Panagah in each district was planned to be established to provide food and stay facility to poor people. - TLTP

Govt allows export of textile masks: Razak

ISLAMABAD: Adviser to Prime Minister on Commerce and Investment Abdul Razak Dawood has said that the federal government has allowed export of textile masks. In a series of tweets on Thursday, Dawood said that the export of masks will not apply to surgical and N95 masks. "Pleased to announce the approval of the export of textile masks. Attached is a copy of the clarification sent by the Ministry of Health to the FBR. Please note that this DOESN'T apply to surgical and N95 masks", he said in one of the tweets. He asked the exporters in another tweet to contact Federal Board of Revenue (FBR) or Ministry of Commerce in case of any inconvenience.

Abdul Razak Dawood said that the West slowly opening up and there are trickles

of orders coming in. "These orders are in different segments to where we were prior to the coronavirus," he added.

Urging the exporters to rise to take full advantage of the situation, the advisor tweeted, "I'm appealing to our textlie industry to take full advantage of these new opportunities to enter new segments and new geography. The government will support you completely."

It must be noted that the National Command and Operation Centre (NCOC) last week allowed the export of hand sanitisers and "textile masks".

On January 31, a ban was imposed on the export of face masks and hand gloves as "a first precautionary measure" and to ensure availability of "sufficient basic first aid material" due to the coronavirus pandemic. - TLTP

India speeded up atrocities in IoK amidst virus: Masood

ISLAMABAD: President Azad Jammu & Kashmir (AJK) Sardar Masood Khan has said that India has intensified atrocities in Indian Occupied Kashmir (IoK) amidst coronavirus

challenge.

He made the remarks during his visit to National Disaster Management Authority here on Thursday where he met with NDMA Chairman Lieutenant General Muhammad Afzal.

The AJK president pointed out that Kashmiri youth are being killed by the Indian occupation forces in detention centers.

Indian occupation forces in detention centers.

Sardar Masood Khan appreciated the highly effective role being played by National Disaster Management Authority (NDMA) in the fight against coronavirus. He was also appreciative of the provision of personal protective equipment to the

provision of personal pro-tective equipment to the doctors and medical staff of Azad Kashmir. Lieutenant General Muhammad Ažal said that the testing capacity for coronavirus is consistently being increased. - TLTP

Hamza's judicial remand extended till May 7

LAHORE: An accountability court on Friday extended the judicial remand of Pakistan Muslim League Nawaz (PMLN) leader Hamza Shehbaz Sharif till May 7 in assets beyond means assets beyond mea

in assets beyond means case.

Justice Jawad-ul-Hassan presided over proceedings and awarded the accused an extension of 14 days in his judicial remand.

Leader of the opposition in Punjab assembly was not presented in the court due to the ongoing coronavirus pandemic.

The court has ordered authorities to present Hamza Shehbaz Sharif before the court in the next hearing slated for May 4.

Justice Jawad-ul-Hassan also ordered the National Accountability Bureau (NAB) to file a reference against Sharif, sooner rather than later.

(NAB) to file a reference against Sharif, sooner rather than later. According to the NAB, the PML-N leader is accused of accumulating assets through unfair means and was involved in money laundering through his servants.

money laundering through his servants. It must be noted that the NAB had arrested PML-N leader in the assets beyond income case on June 11, 2019, after LHC had turned down his applica-tions for extension in inter-im bail

On Feb 25, the Lahore High Court (LHC) rejected the bail plea of Pakistan Muslim League-Nawaz (PML-N) leader Hamza Shehbaz in assets beyond means case. - NNI

PTV to live telecast Taravih prayers in Ramazan: Firdous

NATIONAL

Violators of SOPs during lockdown to be dealt with

ISLAMABAD: Special Assistant to the Prime Minister on Information and Broadcasting DF Firdous Ashiq Awan said on Thursday that strict action would be taken against the violators of Standard Operating Procedures (SOPs) during lockdown.

The government has been considering constituting committees to ensure the complete implementation of SOPs in religious activities during the month of Ramadan. Religious scholars, community leaders and political leaders would be a part of these committees, she said.

try can create economic issues for the middle class and low-income people, so the government would cordon off the areas where corona cases would emerge," she further added.

After the 18th amendment the provincial governments are free to take measures for the welfare of public; however, the federal government would support the provincial governments by providing guidelines, she mentioned.

Political opponents should stop playing politics in this situation and should focus on serving the masses, she remarked. "We respect the doctors

and paramedical staff as they were fighting against the fatal disease", she said adding the government is focused on the safety of the masses.

Meanwhile, Dr Awan said in a tweet that on the directives of the Prime Minister, Pakistan Television (PTV) has arrangements for live telecast of Taraweeh prayers during the holy month of Ramadan.

She said as always, the blessings of the month of Ramadan would reach every home. She said in this time of epidemic, people would stay in their homes and participate in live telecast of Taraweeh prayers. - TLTP

SECP committed to growth of capital markets: Aamir

ISLAMABAD: Chairman Securities and Exchange Commission of Pakistan (SECP) Aamir Khan has expressed resolve to strongly respond to the impact of COVID-19 challenge and convert it into opportunity for the growth of capital markets.

He expressed these views during a meeting with the Board of Directors (BoD) of Central Depository Company of Pakistan (CDCP).

The SECP is actively engaging the market stakeholders to mainly assess the situation arising out of the COVID-19 pandemic and its impact on the capital markets.

The CDC Board updated the SECP chairman on the latest developments, especially in light of the COVID-19 pandemic, reforms that CDC has been undertaking, and status of different projects while identifying areas for future development.

It was noted that despite the chal-

lenges created in the wake of COVID-19, the CDC has been able to ensure smooth and un-interrupted

COVID-19, the CDC has been able to ensure smooth and un-interrupted operations, including the shifting of its majority workforce on "work from home" basis which demonstrates the robustness of business continuity arrangements.

The chairman SECP appreciated the measures being taken by CDC in development of the capital markets and ensured SECP's full support to CDC while also identifying areas which require more focus and dedication of resources. He also ensured SECP's resolve to strongly respond to the impact of COVID-19 challenge and convert it into opportunity for the growth of capital markets.

Earlier in the day, the Commissioner (SM) also chaired meeting of the Capital Market Advisory Committee, which has representation from SROs, market

funds and insurance sector.

The committee reviewed the recent reforms and noted that due to timely response by SECP in addressing practical difficulties and effective and resilient business continuity arrangement of SROs, the stock market continued to operate successfully despite the threats posed due to COVID-19 pandemic and resultant scenario in the country.

It was also noted that the widening of circuit breakers and market halts implemented by SECP in February played a key role in ensuring efficient price discovery and significant trading volumes in the market which is also appreciated by foreign investors.

The committee also discussed various issues facing the industry and several major areas were identified for development and growth of capital markets. - TLTP

NAB Executive Board approves six inquires

ISLAMABAD: A meeting of National Accountability Bureau (NAB) Executive Board Meeting (EBM), chaired by Chairman NAB Justice (Retd) Javed Idbal, has approved six inquires on Thursday.

Deputy Chairman, Prosecutor General Accountability, Director General Operations and other senior officers attended the meeting.

It is years long set policy of the

bureau that the details of the EBM-NAB meeting is shared with the peo-ple, which did not tend to hurt anyone. All the inquiries and investigations are initiated on the basis of alleged allega-tions which are not final. The decision to proceed ahead with the cases is taken after listening to the both sides of the pic-ture

ANF seizes 1.689 metric tons drugs worth \$1.28 billion in 11 operations

RAWALPINDI: The Anti-Narcotics Force (ANF) Pakistan seized 1.689 metric tons narcotics valuing US \$ 1.28billion internationally. The ANF also arrested 10 culprits and impounded 5 vehicles while conducting 11 counter-narcotics strikes, a press statement said Thursday. The seized drugs comprised of 1120 Kg Morphine, 315.800 Kg Opium, 251.900 Kg Hashish and 2 Kg Heroin. As per press statement, in an intelligence based operation, ANF Quetta raided at abandon house located at Nilan Rodh, Tehsil Mashgail, District Kharan and recovered 300 Kg Opium

from the Toyota Hilux Double Cabin parked in the said house.

In another operation, ANF Quetta recovered 1120 Kg Morphine from a Dry Nullah located at Kohe-Rodini, Girdi Jungle, District Chaghi. As per initial information the recovered drugs were placed for handing over to some other narcotics gang.

An another operation, ANF Lahore raided near Hajvari Town, Hurbanspura, Lahore and recovered 500 Gram Hashish from personal possession of the arrested accused namely Muhammad Osama resident of Lahore.

On a tip-off, ANF Peshawar in collaboration with FC KP (Khyber Rifles) intercepted a Toyota Corolla car near Bigyari Check Post and recovered 4,800 Kg Opium from the said vehicle. An accused namely Israt Khan resident of Khyber was arrested. In another operation, ANF Peshawar in collaboration with FC KP, 161 Wing, Mahsud Scouts intercepted a FX car near Nala Check Post and recovered 2 Kg Hashish from the said vehicle. Resultantly an accused namely Hazrat Noor resident of Khyber was arrested on the spot.

Greenhouse gases don't respect national boundaries: Guterres

ISLAMABAD: In his message for International Mother Earth Day, UN?Secretary-General?António?Guterres has acknowledged that all eyes are on the COVID-19 pandemic, which he flagged as "an uprecedented wake-up call."

Recognizing the "immediate and dreadful" impact of the of the covery. The covery into "are all opportunities the pandemic.

"Greenhouse gases, just like viruses, do not respect national boundaries," stated the top UN official. "We must act decisively to protect our planet from the covery. While spending huge amounts of money to bring economies back, Guterres asserted, "We must deliver new jobs and businnesses the maintained that it needs to be tied to achieving green jobs and sustainable growth. He also underscored that to make societies more resilient, mate disruption is approaching and dreadful" impact of the covery into "a real opportunity to do things right for the sum the recovery into "a real opportunities must be incorporated into financial systems," And where taxpayers' money

need to work together as an international community".

"On this Earth Day, please join me in demanding a healthy and resilient future for people and planet alike", he concluded. - TLTP

Oil drop below zero for first time

The price on the futures contract for West Texas crude that is due to lose validity Tuesday pushed down into negative territory. The justification with the pandemic bringing the economy to a deadlock, there is so much unused oil dripping around that American energy companies have run out of room to store it. Even if there is no warehouse to put the oil, no one desire a crude contract that is about to come due. From the start of the year, desire a crude contract that is about to come due. From the start of the year, oil prices have drowned after the consequences of the coronavirus and a breakdown in the original OPEC and agreement. The U.S. oil market has become with industrial and economic activity crushing to a stop. Governments around the globe are extending shutdowns owing to the quick spread of the coronavirus. An unusual output deal by OPEC and associated members a week ago to control supply is proving very little in the front of about 33 percent crush in global demand. There is indication of feebleness everywhere. Just before Monday's down, buyers in Texas were offering as ness everywhere. Just before Monday's down, buyers in Texas were offering as merely as \$2 a barrel last week for some oil streams. Bankers in Asia are largely unwilling to give commodity traders the credit to survive as lenders grow ever more dreadful about the threat of a catastrophic nonpayment. In

New York, West Texas Intermediate for May delivery declined as low as negative \$40.32 a barrel. The price collapse is resounding across the oil industry. Crude explorers closed down about 13 percent of the American drilling fleet last week. Whereas production decreases in the country are increasing pace. Oil prices getting smashed due to absence of demand. West Texas Intermediate crude oil confused pace. Oil prices getting smashed due to absence of demand. West Texas Intermediate crude oil confused Monday, lower 28 percent or \$5.15 to \$13.12.Brent crude, the international standard was depressed \$1.01 to \$27.06. Economic conditions are suffering as countries try to decline the spread of coronavirus by closing down all operation. Past week, China showed its gross domestic product diminished for the first time since people started keeping records in 1992. Slower economic growth means there will be less demand for oil and its byproducts, which include gasoline and jet fuel. In a split up report out Thursday, OPEC stated global demand will down by 6.9 million barrels per day surrounding the COVID-19 pandemic. In a separate report out Wednaeday. aay surrounning the COVID-19 pan-demic. In a separate report ou Wednesday, the U.S. Energy Information Administration stated 9.3 million barrels per day of demand has been erased. Oil prices smashed below US\$0 for first time amid devastating

oversupply. Oil prices ended New York trading in the adverse on Apr 20, 2020, for the first time ever, as a supply excess compelled traders to pay others to take the commodity. The crisis was deteriorated by a price warbetween Saudi Arabia and Russia. Riyadh and Moscow constructed a line under the dispute and, along with other top producers, reached a deal to decline output by somewhat 10 million barrels a day earlier this month. However prices have fell as analysts stated the cuts are not sufficient and as storage facilities reach size.

With storage facilities filling up rapidly, there are apprehensions that there will be nowhere to store it. Dealing with the problem President Donald Trump reaffirmed his promise to fill up the Strategic Petroleum Reserve. The turmoil in the oil market comes as the petroleum industry rises as one of the backbone of the global economy made most vulnerable by government shutdowns to restrain the spread of coronavirus. The commodity has been further feeble by a battle for market share that raged much of the jump between Saudi Arabia and Russia. The ther receive by a battle for market snare that raged much of the jump between Saudi Arabia and Russia. The European benchmark contract, London Brent North Sea oil for June delivery, finished down 9 per cent at US\$25.57 a barrel. Most of European stock mar-

kets finished the day higher as governments start to consider how and when to mitigate the lockdowns that have hit the global economy. Italy, Spain, France and Britain reported reduction in daily death tolls and diminishing infection rates, while Germany began permitting some shops to reopen and Norway resumed nurseries.

Oil prices rise after landmark crash to below zero.US crude prices rose above \$1.10 after a supply abundant sent prices escalating downward, but worries about demand stay. Oil prices recovered some losses from a record crash on Tuesday, with United States crude turning optimistic after trading below nil for the first time ever. But this will not take place before May, and the size of the reduction is not large enough to revive market balance. OPEC and its allies will most possibly consider larger output reductions and the US will be more tempted to consider reducing supply. There is at risk, because not only investors are in the financial markets for crude oil, but financial markets for crude oil, Innancial markets for crude oil, but also the millions of people engaged in the oil and gas industry. In the meanime US crude inventories were anticipated to rise by approximately 16.1 million barrels in the week to April 17 after recording the highest one-week established in history.

from experience China: Lessons

OVID-19 has not only posed a huge threat to the World community & specially first of all Chinese people's safety and health, but also a major challenge to the global public health security. There had been no newly confirmed indigenous cases in China outside Wuhan for several days. At the same time, imported confirmed indigenous cases as the daily reports said. In the next stage, China's main task is to rein in the imported cases and defend themselves from cross-border infection.

tion.

China will update the response measures to prevent the resurgence of the epidemic. As new COVID-19 cases skyrocketed in other countries, China's experience in fighting the epidemic will offer lessons and clues for the rest of the world to contain COVID-19. In this regard, China's experience can be distilled in 10 words/phrases: speed, strength, transparency, responsibility, coordination, overall planning, technology, balance, cooperation, and timely correction.

Speed: Rapid response: COVID-19 is a very special within Covid control of the control o

ance, cooperation, and timely correction.

Speed: Rapid response: COVID-19 is a very special virus. China's experience in combating COVID-19 shows that it is possible to control the epidemic if effective measures are taken as early as possible. Such measures made the "Four Earlies" possible, as they encouraged patients to seek treatment as early as possible like on January 23, Guangdong province initiated a first-level public health emergency response, with a suspension of public places, allowed every single patient to receive timely treatment in hospitals.

Strength: Intensified measures. Infection prevention, control and patient treatment require both speed and strength. China showed super strong determination to block the transmission of COVID-19. The Chinese governments at all levels and all communities worked hard to fully implement joint prevention and control measures.

Crinias Responses weasures oased on virus and precise evaluation of risks.

Transparency. As the COVID-19 pandemic threats every person and every country, real-time information sharing is a must for both China and the international community. Transparent information disclosure can never be overemphasized during the war against COVID-19. Committed openness and transparency, the Chinese government has released trustworthy epidemic-related information in a timely manner without reservation. China has shared its experience in epidemic containment and patient treatment, and responded openly to concerns at home and abroad. As a result, China has avoided public panic and put down rumors and misinformation, and succeeding in communicating the progress in epidemic prevention and control.

Responsibility. China demonstrated strong courage and a sense of responsibility to fight COVID-19 as an enemy. If we compare epidemic response to a "war", it

Responsibility. China demonstrated strong courage and a sense of responsibility to fight COVID-19 as an enemy. If we compare epidemic response to a "war", it is considered to be the people's war. WHO encouraged every person, especially every leader at any level and from any sector to stand in solidarity and seize every single opportunity to prevent, contain, curb, delay and reduce the impact of the virus. It is a collective commitment to the humankind. UN Secretary-General AntónioGuterres delivered a speech saying "we must declare war on this virus" and calling on governments to cooperate in order to "ensure targeted support for the people and communities most affected by the disease." As the first country to move, in fact, China had already mobilized its governments at all levels, all its communities and people to kick out the virus. No one was alone in the combat. Every single member of the society from governments to citizens and from medical system to other industries were actively involved in this fight by playing different roles in preventing infection and treating the disease. All Chinese people were united in the battle.

Coordination. China demonstrated a strong ability to the secretary and the second and a strong ability to the secretary and the secretary of the secre

Coordination. China demonstrated a strong ability to rganize a full-scale battle against the COVID-19 virus. Epidemic response requires the systematic and complex efforts of the health sector and the entire society. Efficient and flexible coordination played an indispensable role in combating the virus and made quick and effective response possible. Efficient coordination enhanced preparedness, enabling the medical system to handle the outbreak in a timely, effective and composed manner. Good coordination means the number of cases were well controlled to avoid shortage of medical resources for severe cases whereas infection rate and number were reduced through effective quarantine. This helped a lot to block off the source of infection through monitoring and screening.

helped a lot to block off the source of intection through monitoring and screening.

Overall Planning. The epidemic outbreak tested and proved the power of the Chinese tradition of overall planning. An outbreak on this scale would surely rock the economy and society. History shows that a severe epidemic or disaster could lead to economic downturn and social disorder which in turn worsens the situation. No country would like to be trapped in such a vicious circle, and China is no exception.

Science and technology.

China has taken a scientific approach towards

Science and technology.

China has taken a scientific approach towards
COVID-19 outbreak. Science and technology remained
the most powerful weapons against the epidemic as
quoted by President Xi. Without this approach the fight
could have been blind. On the other hand, a warrior well
equipped with scientific tools and techniques has a
much higher chance of victory. After the outbreak,
Chinese researchers identified the whole genome
sequence of COVID-19 in less than a week and isolated
the strain of the coronaivius, and the findings were strain of the coronavirus, and the findings were ediately made public to the world.

immediately made public to the world.

Balance. Technology can't do everything automatically to fight his pandemic so non-technological measures must play their roles. There is no specific drug or vaccine available as yet but China has effectively contained the epidemic by embracing non-technological means. Some people in other countries considered China's epidemic response measures as "over-reactive" whereas some even questioned China's political system.

Cooperation. Virus knows no borders. Victory over COVID-19 is of utmost significance to the safety and health of not only the Chinese people but also people

health of not only the Chinese people but also people around the world. While fighting a hard battle against the virus, China received countless condolences and

support as well as large amount of supplies from many countries. Since the very beginning of the outbreak, China has highly valued international cooperation on public health and provided timely information updates to WHO and the global community and shared the genome sequence of the coronavirus in an open and transparent manner.

Timely remedy China.

transparent manner.

Timely remedy. China has a huge population of 1.4 billion, so it is essential to stay alert to and prepared for any major epidemic and public health emergency. As President Xi Jinping said, the epidemic was a big test for China's governance system and capacity. He called on the people to learn from past mistakes and continue to improve. Considering that WHO has declared COVID-19 as a pandemic, China had met with difficulties and showed shortcomings in the earlier days of the outbreak, while other countries were not well prepared either even after China made some progress in fighting the virus. In short, every country has weaknesses and problems in their epidemic response. China's problems include formalism and bureaucracy which hindered some epidemic prevention and control efforts. China was serious about these weaknesses and has taken quick remedial adjust-

prevention and control efforts. China was serious about these weaknesses and has taken quick remedial adjustments and corrective measures and has planned to take even more remedial actions after the outbreak is over.

The world has seen that the government and the people of China didn't panicked or taken delayed decisions instead they shown their resilience in this course of pandemic. Chinese noble struggle against the deadly lovel corona virus was appreciated and acknowledged by the world which clearly reflects that how they act in this hour of distress. They gave weight age to their medical experts' opinions and proved that apart from being self sufficient in resources, nations can also be recognized by their self determination, upright consciousness, display of unwavering discipline and collective sense of responsibility. lective sense of responsibility.

The writer is Secretary-General Pakistan China Friendship Association Khyber Chapter & President Radio China Listener's Club apart from Media Consultant. He can be reached at: sveed.gilani@gmail.com

Doing business or political point scoring in the name of COVID-19

hen there is no other preventive and therapeutic treatment for corona virus then why not to try Hydroxychloroquine and Super-Immuno IV-Drip with high Vitamin C which are scientifically which are scientifically proven to be affective. You must trust evidence based medicine and prevent huge loss of life than to wait for

randomized trials which may take more than a year I have failed to understand that coronavirus infection is spreading in the country and still no one is serious and everyone is trying to do business and political point scoring on the cost of lives of the people. The disease is expected to spread rapidly in the country and God forbid there can be huge loss of life if we are not serious.

Pakistan Allergy Asthma and Immunology Society has developed the protocol with cheap medicine and immunobosters which can be preventive and treatment. This protocol is being followed with similar medicines in UK and in different countries. I am receiving several requests daily for this protocol which is registered Patent protocol in USA. I was informed similar medicines are being used by Queen I have failed to understand that coronavirus infec-

informed similar medicines are being used by Queen Elizabeth Hospital Edgbaston Birmingham. In fact one of their consultants was having corona virus infection and was treated by a doctor who got our protocol from me. Pakistan Allergy Asthma will be publishing easy to read and follow guidelines for pre-vention and treatment to be used by general public, clinics hospitals and ICU Units for serous patients. The COVID-19 pandemic has gripped the entire

world to a standstill. While there are unprecedented number of hospitalizations and mortality rates, scientists are yet to firmly develop, or have consensus on, the prevention and treatment medicines or vaccines for the treatment. COVID-19 vaccine may take up to a year to come to the market. Even after its introduction to the market, it is still unknown how long will global distribution take.

Evidence Based Medicine or Randomized Clinical Trials: I am sorry to say that we are still not serious and cannot appreciate the gravity of the situation. We must reevaluate our lockdown policies and re-evaluate vidence-based medicine. Most of the scientists are advocating Randomized Trials before starting

are advocating Randomized Trials before starting simple effective medicines which can save life. They simple effective medicines which can save life. They dismiss the Observational studies providing evidence of the effectiveness of medicines such as Hydroxychloroquine without rigorous reviews, recommending suspected studies just because these happen to be randomized trials. We must understand that time is passing fast and we are losing precious lives and we cannot wait for months for those luxury randomized trials. We need to act fast and use the data

we have.

First, we must understand what Evidence Based medicine is. Let me explain; Evidence-based medicine is the integration of individual clinical expertise with the best available research evidence from systematic research and the patient's values and expectations. The efficient approach to finding the best evidence is to identify a systematic review or evidence-based clinical practice guidelines by integrating each study into the body of existing data, combining the best available science, reaching defensible conclusions and prescribing the medicines which can be effective.

To explain a little further - by leveraging the evidence-based medicine approach we can know the Pre

randomized Trial Probability of Success, which means that we can evaluate the likelihood of the drug efficacy before we get the data from the randomized scientific trials.

For the pandemic at hand, I would like to advocate Hydroxychloroquine, which is endorsed by half of the world while the others oppose its use, as prophylactic and therapeutic treatment for Covid-19 infections

Hydroxychloroquine has a long history of use as ntimalarial, antibiotic and antiviral. It has proven to be effective in vitro to inhibit corona virus by changing the structure of the receptors and preventing the attachment of the virus to the receptors on the target cells. In scientific terms, it inhibits viral entry and replication via intracellular alkalization, by interfering w/ maturation of viral particles through impaired glycosylation which are the indirect immunomodularv effects

glycosylation which are the indirect immunomodulatory effects.

Even if we consider that the chances to be affective are 50:50, we must consider its use since there is no other alternative. To advocate its effectiveness let's look at the following studies:

1. Efficacy of hydroxychloroquine in patients with COVID-19: results of a randomized clinical trial by Zhaowei Chen etall (BMJ Yale): 62 hospitalized pts (mean age, 45 yo) w/ mild dz (SAO2 >93%) due to confirmed COVID-19 randomized to HCQ 200 mg bid x5 days or placebo, plus standard of care; HCQ-treated pts had shorter duration of cough (2.0 days vs 3.1 days) and fever (2.2 days vs 3.2 days), and higher rates of pneumonia improvement (80.6% vs 54.8%); 4 pts in placebo arm progressed to severe dz; 2 pts in HCQ arm developed mild ADRs

2. Hydroxychloroquine and azithromycin as a treatment of COVID-19: results of an open label non-randomized clinical trial Philippe Gautret P: Thirty-six patients in France with COVID-19 were examined.

Twenty were administered hydroxychloroquine and 16 were controls.

Concerns about taking Hydroxychloroquine: Some people consider hydroxychloroquine to be dangerous since it causes prolongation of QT Interval, but they should consider that most of the medicines being used daily have similar effects. These medicines include the likes of Azithromycin, Erythromycin, Clarithromycin, Levofloxacin, Moxifloxacin, Fluconazole, Ketoconazole, Metronidazole (FlagyI), antipsychotic and anti-depressants. So, Chloroquine and these medicines do not prolong the QT Interval of every person, and adrenaline used for the treatment of anaphylaxis. American College of Cardiology has given guidelines for the heart diseases patients susceptible to developing prolongation of qt interval and Ventricular Arrythmias. Anyone can calculate the Risk Score and if he thinks it can cause Ventricular Arrythmias and according to Risk Factor Score he can avoid it.

Recommendations of American College of Cardiology (ACC) for use of Hydroxychloroquine-Azithromycin Treatment for COVID-19. You have to calculate your Risk Score for drug-Associated QTc prolongation by consulting the table and adding the Risk factor Points: If you have less than 6 Risk factor Points you have Low Risk to develop prolongation of QT interval and Ventricular fibrillation; If you have To points you have Low Risk to develop prolongation of QT interval and Ventricular fibrillation; If you have more than 11 points, then you have high risk The guidelines are on webpage www.allergypaais.org and www.allergycenter.info and can be downloaded or you can have by email.

The Quarantine: Damnation or benison

hen the entire world was busy in their zest and the technologies were crossing the horizons, landing on the moon and discovering other planets, No one noticed that their own planet is

Engr. Salman
Shaheen Charoo

Engreting affected by a virus and is breathing its last. The modern concepts and the influence of technical era completely made the world callous at some point and all they were focusing on what they call 'A Career' and suddenly the priority got replaced from 'Career' to 'Life' because of a small change in the RNA of a person which is dangerous enough to get him killed and thus humans shun all their plans and activities and now all they care is

about their life which has become a necessity.

Humans were having no time for the recovery whether that was the recovery of relationships or split family or lost friends or forgotten acquaintances or The Dying Earth'. The clock of life tickled so fast for the human creatures that they hardly used to spend a quality time without the havoe. On the other hand, the earth suffered by the hands of humans up to an extent that it started rapidly losing its treasure like the fresh water and the green gold but the selfish humans hardly paid any heed to its cries until the earth declared a worldwide break for its recovery.

recovery.

The plans were about to get executed when the world enunciated an immediate lockdown. The cities that never slept are now sleeping after decades, the streets which were always pre occupied are now empty, the stars which were hardly able to twinkle are now shining as if they have been blessed with a new light and the birds have started singing with joy again as if they have been praised by the unseen.

The people are now spending a quality time with their families which was disturbed and destroyed by an aura of fast life. I hardly remember a day when I woke up peacefully from my sleep as the noise of people, busy streets and sound of machineries always paid a vital role in the destruction of peace but now people are witnessing some miracles which they hardly thought of. Now the people are waking up by hearing the chirping of sparrows, the caw of crows, and the coo of pigeons and are breathing a free air.

The humans are wondering what actually happened.

breathing a free air.

The humans are wondering what actually happened and how did the plague commonly known as 'COVID-19' spread? The virus indeed is troubling humans up to an extent that majority of the people have nothing to eat at their places, some are losing their jobs, some are stuck at an unexpected place and so on but is it not something which we brought to us by our own deeds and actions?

In the noble Qur'an, it is mentioned clearly 'And do not mischief on the earth after it has been set in order: that will be best for you, if you have faith' - Surah Al A'raf,

The Heights, verse 85. If the humans would have respected the Mother Nature and preserved its treasure and suppressed their greed than today we would have been living a free life and not a quarantined one.

This quarantine period proved damnation for the humans without any second thought but on the other hand, it has been proved itself a benison for the nature and the earth. When the human activities stop, nature takes over miraculously and let us now learns a lesson from this incident as for sure this too shall pass but the lessons learnt from it should be implemented in the upcoming time so that the earth won't introduce more deadly plagues and its eternal suffering will come to an end.

The writer is also an author and an engineer. He writes majorly on the nature and social issues and hares his writing in the form of blogs and poetries. He can be reached at: Salmancharoo5@gmail.com

Speedy internet needed amid corona

It is an undeniable fact that the outbreak of the dead-liest COVID-19 pandemic has left world in a tremendous shock and badly affected all infected countries. The scale of this lethal pandemic has been observed more severe and intensified in European coun-tries where thousands of people died and thousands of others fall in confirmed cases gradually. This lethal COVID-19 pandemic has not merely affected global economy and socio-political activities of the world only but also ruthlessly hit the global education system of the world

world.

After a short space of time, advanced states of the world successfully launched comprehensive method for online classes for students as they can resume their academic responsibilities effectively. Pakistan is also one of the reputable states in the world which is also miserably affected. Owing to outbreak of COVID-19 pandemic, all educational institutions have been shut down. In this

regard, The Higher Education Commission has appeared and successfully introduced some productive software and approaching number of universities to start online classes.

and approaching number of universities to start online classes.

According to some resources there are many universities that have successfully started online teaching - like LUMS - to facilitate students those are enrolled in various universities of Pakistan. Unfortunately, the picture of my beloved land District Kurrum (Parachinar) is still disappointed. Let me introduce very short background of this area to all my readers; Initially, this area was considered Kurrum Agency as a part of FATA that remained many years under the supervision of Federal government. Recently, its status has been changed and it is known as District Kurrum and now it directly falls under the supervision of provincial administration of Pakistan. Owing to outbreak of pandemic and lack of stable enough internet connection have left the people of my area in a complete confusion. Apart from suffering socioeconomic activities of these people, our education sys-

tem is also ruthlessly affected. Currently, amidst COVID-19 pandemic two perspectives have been widely observed in Pakistan. Firstly, good internet connection
system has become a lifeline for every social, political
and economic activity because most of us are following
given direction of the government to be remain safe to
stay at home, adopt self-isolation, self-quarantine and
more importantly practicing social distance against
COVID-19 pandemic. Secondly, almost all provinces of
Pakistan are blessed with fundamental facilities where
and internet connection system comes first. also ruthlessly affected. Currently, amidst

good internet connection system comes first.

As far as District Kurrum (Parachinar) is concerned all As far as District Kurrum (Parachinar) is concerned all academic institutions are not merely deprived of good internet connectivity, but our students also who are enrolled in various schools. I teach as a teacher at the most reputable school named Bloom's International School Parachinar. Being a responsible teacher, I can truly understand the academic difficulties of our students because we are deprived of online classes due to lack of good internet connection facility. Moreover, there are many students of this locality who successfully secured

many students of this locality who successfully secured their admissions in various universities of Pakistan. It is also observed that these students are also confronting the dilemma of good internet connectivity to resume their online learning. In this regard, Supreme Court of Pakistan has recently given directions to Ministry of Information Technology to resolve the prolonged issue of good internet connectivity 4G of various areas of Khyber-Pakhtunkhwa where Parachinar comes first. It is my humble request to the authorities of district Kurram and provincial administration to look of this issue seriously and resolve the dilemma of good internet connectivity which will save the quality of education of our students of this area. our students of this area

Is pen too dangerous?

Aamir Reyaz Shieikh & Shabnam Ahad How powerful is the media influence? Influence of mass media...Media influence is the actual force exerted by a media message, resulting in either a change or reinforcement in audience or individual beliefs.

used against them to silence there voice.

But there have been such situations in Kashmir that journalism has been declared a crime. After all, how long will the people of Kashmir tolerate this oppression? Wherever the truth is spoken, people are put on fir and then send them to jails. The people of Kashmir had only one hope that was journalism, but unfortunately the country who suppresses the Kashmir by armed powers also declared it a crime. My question is from the United Nations Organization that helps people get the right.

get the right.

If journalism is a crime in Kashmir, why not journalism in the rest of world will be declared a crime? When the whole world is under lockdown and countries are trying to get out of these diseases in order to save the lives of their citizens India is busy in targeting Muslims in mainland India and journalists in Kashmir. After all, how long will we bear all this, we are being persecuted by our rights. A few days ago, one of our sister journalists and one of our brother journalist who were detained I do not understand what was wrong with them if they spoke of the truth.

I do not understand what was mong an increased spoke of the truth.

Journalists in Kashmir are witnessing an increased level of harassment by the police through censorship, interrogation and, in some cases, imprisonment. The illegal detention of the Masarat Zehra, Gowher Gellani Kamran, Asif Sultan and Gowher Wani is the most

recent such incidences.

A simple change in the winds of politics can become the trigger that eventually takes aim. As Kashmir has suffered one conflict after the other, beyond the state's citizens, journalists have paid the price too, facing death threats and even suffering attacks on their family members as a result of efforts to silence them.

Due to frequent internet blockage IoK journalists, face difficulty in broadcasting their stories and full filling their duties. In recent lockdown and revoke of article 370, life in IoK became stagnant and miserable. The lockdown of the internet has ceased communication. The Indian authorities had snapped the broadband internet connection of the Kashmir. Hence, Internet blockage is the main hindrance in full filling the profession of journalism in IoK.

internet connection of the Kashmir. Hence, Internet lookcage is the main hindrance in full filling the profession of journalism in IoK.

On the other hand, under the draconian Unlawful Activities Prevention Act (UAPA), journalists are captured, detained, tortured and molested by the Indian army for portraying the true events to the world. Where is your power? Where is your ego? Where are your armies? You have always acted like you are unbeatable...where are you now? Hidden at home and scared from an unseen creature. Now try to think again there is someone powerful than you...someone who can beat you with an unseen solider...please try to remember next time if you get another chance ...remember that our Lord sees you while you are willing the innocent kids and women in the muslim countries. He sees you while you are ordering the weak Muslim rulers to kill the scientists and pur religious people in jails to keep the society empty from all positive people. Now you are tasting fears from death for few weeks only. The kids of Kashmir, Iran, Syria, Palestine, Afghanistan, Uighur tastes this kind of fears from last 90 years.

There were people dving everywhere getting massacred in every town and village, there were people being picked up and thrown into dark jails in unknown parts, there were dungeons in the city where here

many never emerged alive, there were thousands who had disappeared leaving behind women with photographs and perennial waiting, there were multitudes of dead bodies on the roads, in hospital beds, in fresh martyrs' graveyards and scattered casually on the snow of mindless borders. This is the life of Kashmiri pool continuous lockdown for the last 80 years.

We believe that the common people of India are totally ignorant of the Kashmir issue and about the atrocities being unleashed upon Kashmiris by those whom they call saviors.

They only know what their biased media tell them. The day they know the reality of and atrocities being unleashed upon the unarmed innocent Kashmiris they would came out on roads to ask for our rights. Last year the chief of Indian army in a statement advised young Kashmiris to laptops, pen and books instead of stones. We follow his advice and doing the same by writing this piece.

Kashmiri people are fighting the war for freedom leading and the same and the same by the leading and the same by the leading and the leading and the leading and the same by writing this piece.

We follow his advice and doing the same by withing this piece.

Kashmiri people are fighting the war for freedom. India cannot stop this freedom movement through atrocities, as Kashmir dispute is a problem of humanity, human rights, and freedom. It is time to end the western policy of malign neglect.

One of the great writers who quote one of the great quotes about Kashmiri "Everyone wants Kashmiri but no one wants Kashmiris.

Aren't I a miracle? A seed that survived the slaughter & slaughters to come. I think I believe in freedom I just don't know where it is. I think I believe in home, I just don't know where to look."

The main writer is from Jammu & Kashmir. He can be reached at: aamirphysivy306@gmail.com

Coronavirus and poverty

ed by a fledual fusions age, resulting in elinier a ranging of reinforcement in audience or individual beliefs.

Journalism has not yet created crime in the world. But there is a country in the world where there is a state that has been demanding its rights for the last 70 years, declared there journalism is a crime. But why have they been declared a crime, if they say the truth, they help people bring them back there rights and putting questions of people in front of the world. Where there is a lot of oppression and people are being persecuted. If journalists do not make the authorities aware about the sufferings of its citizens then who will make them aware about their problems.

Kashmir being a conflict zone where free and fair journalism is under attack who so dissents will be charged with doctrine laws in order to silence the pen of his ink.

farzana wani

If the COVID-19 threat continues and in view of possible months-long lockdown, these people will surely die due to hunger.

This small virus has brought whole world to a halt. The condition is deteriorating day by day, this deadly virus has not even left the developed countries of the world. This virus does not discriminate between rich and poor. The outbreak of pandemic disease from china has engulfed the globe. However experts are still looking for a cure and I hope Ins Sha Allah we will find it soon until we have to suffer that has been caused by lockdown and social distancing. This virus has made us understood the importance of life.

The robust healthcare infrastructure in Europe is overwhelmed. Now other countries want to pre-empt such a situation from developing. So the government

decided on a two pronged strategy: lock down the entire nation to break the chain and quickly ramp up its health care facilities to face the pandemic.

The impact of the coronavirus is having a profound and serious impact on the global economy. The global economy has entered a recession as a consequence of the coronavirus pandemic. There are lockdowns across the world, hitting economies hard.

Everyone is supporting the lockdown to break the chain. No doubt, we have to do that to protect ourselves. Everyone is suffering in one way or another and facing difficulties, however there is a sect in our society who may not die due to this virus but of hunger. These are the people that include street vendors, labourers, factory workers, conductors who used to go out on a daily basis and work for their livelihood. They are not government employees, industrialists, entrepreneurs or working in MNCs .they just

have to go out daily out of their homes to their basic needs. People belonging to higher classes or middle classes are struggling so what about these

Propole? These people will surely die due to hunger. Government needs to look on this matter, the government needs to deduct some amount from salaries as fundraising for the poor. We as responsible citizens can also make community groups can collect funds and identify such families who are in need.

We may die prior to COVID-19 due to depression. People may suffer anxiety disorders. Death in this time of COVID-19 is a disaster as people cannot even mourn collectively. This is not only scary but traumatizing. Lucky are those people who died before this pandemic.

that you love to do. Eat right food which boosts immunity and it's more important to introspect and

that you love to do. Eat right food which boosts immunity and it's more important to introspect and seek God's mercy.

The lesson to be learnt from this pandemic is that the government needs to invest more in health care sector. Creating more medical colleges is a necessity, overall improving health infrastructure.

With this I am concluding, I would like to request all the people and corporates to donate towards feeding the daily wagers of our society. This is the time they need our help and we need to step up. If anyone can't afford to donate, please help by spreading the word. Let us pray to almighty to prevent entire humanity from this deadly virus.

Religion - A trust on God

Religion is a deen' or we can say religion is that we trust on God. It is a social culture, value which we have belief on God or faith on God. There are so many reli-gions like Muslims, Sikh, Christians and Hindu etc

Aiman Anwar

Aiman Anwar

Cour religion is Islam. What is Islam, anyone or anything that surrenders itself to the true well of Allah and we have only faith on Allah. Islam is not only a religion, it is considered as the complete way of life. The religion of Islam is all about the attributes

of peace, harmony, unity, forgiveness, and mercy.

Muslims - persons who believe or follow the
Islamic religion are known as Muslims. All Muslims
believe in the oneness of Allah and know that Islam is the final religion sent down by Him so that mankind can attain guidance and piety in this world. It teaches us there is one God, and Muhammad (SAAW) is the us there is one God, and Muhammad (SAAW) is the Messenger of Allah. Muslims consider Holy Quran which is the holy book from Muhammad (SAAW). This is the Holy Book which we can learn many things about Islam. This is revealed on Shab-e-Qadr. In Islam many people divided this so many parts like Hanafi, Shia, Sunni, Al-Hadees. But i do not believe on this. I believe that there is one religion is Islam and there is one God (Allah). And there are many prophets but Muhammad (SAAW) is the last Prophet. Whatever actions, deeds and behaviour followers of Islam depict in this temporary world, we have not to forget at the end the world will end. And everyone has to die one day. They will be accountable for in the next life or the Hereafter. Allah (SWT) is the one who made us and we shall return to him. He is the supervisor of the whole universe. Allah is the one who made the whole universe. He has no parents, no siblings and no offspring. Holy Prophet Muhammad (SAAW) is the last of the Prophets sent by Allah for the benefit of mankind. Hence he is known as the seal of the Prophets. It is a complete book of guidance, Islam is based on five pillars: (1) Testimony of faith (Kalmah Shahadah); (2) Prayer (Salat); (3) Giving (Zakat); (3) Fasting (Sawm); and (5) Pilgrimage (La:ii)

(Haij), (1) Lasting (Salling, Lasting, Lasting, (Haij), In Islam Marriage completes half of our Imaan (faith). In Islam the marriage is the Nikah which two

accepts two people or acceptance of both men as well as women. People believe that there is two caste of marriage upper caste and Lowe caste and caste system but in Islam all are equal and same. Then why people are against this. Why a rich boy can't marry with poor girl? Why Shia Girl can't marry with a Sunni boy? If Shia boy can marry with Sunni girl then why Sunni girl marry with Shia boy. Why people are more against it? Shia boy can marry with Sunni girl then why Sunni girl marry with Shia boy. Why people are more against it? Why people can't understand in Islam there is not Shia, Sunni. Some people fight with each other, they don't know what actually Islam means? Everyone's forgiveness will be accepted without shirk. Everyone is equal. There is only one Islam and one God and Muhammad (SAAW) is the last Messenger.

Dallas hotelier gets \$58.7mn in small business bailout funds

SAN FRANCISCO: Three publicly traded companies overseen by Dallas hotelier Monty Bennett have bor-rowed \$58.7 million under a program aimed at helping small businesses

aimed at helping small businesses through the coronavirus pandemic, and that may be just a start.

"The Company anticipates receiving additional PPP Loans," asset and hotel management company Ashford Inc. said on Wednesday as it reported the receipt of \$12.8 million in Paycheck Protection Program loans for six of its subsidiaries. subsidiaries.

Two real estate investment trusts

advised by Ashford together won 50 other PPP loans totaling \$45.9 million, Securities Exchange Commission filings earlier this week show. The total to the three companies was 285 times the \$206,000 average loan size under the program, which is administered by the Small Business

Most of the loans were made by Key

Administration.

Bank, among the top five lenders in the \$349 billion program. More than 150 public companies borrowed more than \$500 million under the program before it ran out of funds last week, a Reuters review of SEC filings shows. U.S. lawmakers are expected Thursday to approve an additional \$320 billion to the program, and President Donald Trump is expected to quickly sign the bill into law.

The Treasury Department has faced The Treasury Department has faced criticism from Congress and small business groups for allocating too much of the funding to big, public businesses. On Thursday, Treasury changed its "Frequently Asked Questions" guidance about the program, saying "It is unlikely that a public company with substantial market value and access to capital markets will be able to make the required cerwill be able to make the required cer-tification in good faith."

Two public companies that bor-rowed under the initial tranche, Shake

Shack and Kura Sushi, returned their \$10 million each after public outcry over big companies crowding out littler ones for the scarce funds.

Ine paycheck protection program was meant to help companies with 500 employees or fewer pay their employees, and loans are capped at \$10 million. Bigger borrowers could get loans for more if they were split among locations with fewer than 500 employees. At least a dozen companies besides the Ashford accounts of the state of the The paycheck protection program employees. At least a dozen companies besides the Ashford group received loans of \$10 million or more.

Ashford spokesman Jordan Jennings Ashford spokesman Jordan Jennings on Thursday said that Congress purposefully opened PPP to larger restaurant and hotel groups, many of which would not qualify for the Federal Reserve's Main Street Lending Program designed for companies with more than 500 employees.

doing this they might be squeezing out smaller businesses under the PPP program," he said in an email.

Of the new funds to be added to the

or the few minds to be added to the program on Thursday, \$60 billion has been set aside for loans through small banks and community development financial institutions in an effort to reach smaller companies.

Bennett defended his decision last

"My industry and our businesses are completely crushed," Bennett wrote in March as Congress debated wrote in March as Congress debated the \$2.3 trillion economic rescue package, passed March 27, that included the small business bailout. "We should not be disqualified from assistance because we built our pre-

assistance occasion out our pro-viously small businesses into bigger businesses."

Bennett and his father, Ashford's founder, own 16% of the company's shares as well as convertible preferred stock that would confer 70% owner-

The younger Bennett is Ashford's The younger benneth is Ashious CEO and chairman, and also chairs real estate investment trusts Ashford Hospitality and Braemar Hotels & Resorts Inc. Recipients of the loans betained by the three companies were obtained by the three companies were mostly hotels and included Ritz Carlton Atlanta, Renaissance Nashville, and Sheraton Anchorage.

Pakistan's economy as it has brought to a standstill the economic activity and reduced Pakistani exports. The foreign minister said that Pakistan has increased testing capacity for coronavirus. He said, "We had earli testing capacity of three thousand but it will reach twenty to thirty thousand by May." - TLTP

demonize Muslims who face increased exclusion as well
as threat of mob violence.

The spokesperson said the Organization of Islamic
Cooperation (OIC) has also voiced deep concerns over rising anti-Muslim sentiments and Islamophobia within political and media circles as well as the social media platforms
where Indian Muslim minority is being blamed for the
spread of the coronavirus.

Referring to the Indian atrocities in Occupied Kashmir,
the spokesperson reminded that it is an internationally disputed territory and killing of people, use of brute force and
blocking communication links constitutes violation of
international laws. She said Pakistan is concerned over the
increasing persecution of journalists in the occupied territoryon baseless and concocted charges.

The spokesperson said that the Ministry of Foreign
Affairs and its missions abroad continue to provide relief
and assistance to the overseas Pakistani community in the
wake of coronavirus. Food, ration and financial assistance
are being provided to those in need.

She said repatriation of Pakistanis is continuing as per the
comprehensive and phased pland developed with the coordination of relevant stakeholders. She said 5,079 Pakistanis
have been brought back from different countries in the third
phase of this plan. In addition, 1,254 Pakistani nationals
have been brought back through land borders in the last few
days including 41 from India through Wagha border. TLTP

The multilateral development banks' (MDBs) latest finan

The multilateral development banks' (MDBs) latest financial assistance augments their current funding to Pakistan and Moody's expects the extra funding to cover the government's additional external financing needs in fiscal 2020. The G20's recent offer of debt relief to low-income countries will also support Pakistan by deferring principal and interest payments on bilateral debt due between May and December. The deferrals may be extended and involve other creditors. Debt relief by official-sector creditors would provide additional but very modest spending capacity for Pakistan, whose interest payments on foreign-currency debt are around 0.6% of GDP for fiscal 2021, with about one bilateral creditors and another one-third owed rd owed to bilateral creditors and another one-third owed

'We expect Pakistan's real GDP to contract modestly by "We expect Pakistan's real GDP to contract modestly by 0.1%-0.5% in fiscal 2020 (the country's first annual recession, according to our records), with the economy gradually recovering to grow by more than 2% in fiscal 2021. Although the country's export sector accounts for just 9% of GDP, and tourism accounts for just 2% of GDP, the nation-wide lockdown from 1 April to month-end (with a possible extension) to curb the coronavirus will significantly curtail domestic consumption and pose downside risks to economic growth, which threatens a wider fiscal deficit and a higher government debt burden than Moody's currently projects.

Despite the month-long lockdown, the government allowed labour-intensive industries such as agriculture, construction and textiles to resume operations on 15 April,

struction and textiles to resume operations on 15 April, which should aid a gradual recovery in domestic co

tion.

The central bank's cumulative 425-basis-point policy rate cuts since the start of 2020 and facilities to ease the liquidity crunch for businesses further buffer the economic shock related to coronavirus. - TLTP

and related industries could grow to 1.2 million, which is half of the region's 2.4 million aviation-related employment. Previous estimate was 0.9 million. Full-year 2020 traffic is expected to plummet by 51% compared to 2019. Previous estimate was a fall of 39%.

The GDP supported by aviation in the region could fall by \$66 billion from \$130 billion. Previous estimate was \$51

These estimates are based on a scenario of severe travel estrictions lasting for three months, with a gradual lifting f restrictions in domestic markets, followed by regional and intercontinental.

"Airlines in the Middle East continue to be battered by the impact of COVID-19. Passenger traffic has all but "Airlines in the Middle East continue to be battered by the impact of COVID-19. Passenger traffic has all but ground to a halt and revenue streams have evaporated. No amount of cost cutting will save airlines from a liquidity crisis. The collapse of air transport will have devastating effects on countries' economies and jobs. And in a region where aviation is a key pillar of many nations' economies the effect will be much worse. Direct financial support is essential to maintain jobs and ensure airlines can remain viable businesses," said Muhammad Al Bakri, IATA's Regional Vice President for Africa and the Middle East. To minimize the broad damage that these losses would have across the Middle East economies, he said it is vital that governments step up their efforts to aid the industry. The IATA is calling for a combination of direct financial support loans, loan guarantees and support for the corporate bond market tax relief.

In addition to vital financial relief, the industry will also need careful planning and coordination to ensure that air-lines are ready when the pandemic is contained, said IATA. The IATA is scoping a comprehensive approach to restarting the industry when governments and public health authorities allow. A series of virtual regional summits, bringing together governments and industry stakeholders are taking place this week. - TLTP

According to the World malaria report 2019, sub-Saharan Africa accounted for approximately 93% of all malaria cases and 94% of deaths in 2018. More than two-thirds of deaths were among children under the age of

five.

To date, the number of reported cases of COVID-19 in sub-Saharan Africa has represented only a small proportion of the global total, though cases are increasing every week. This means that countries across the region have a critical window of opportunity to minimize disruptions in malaria prevention and treatment and save lives at this stage of the COVID-19 outbreak.

Mass vector control campaigns should be accelerated,

malaria prevention and treatment and save lives at this stage of the COVID-19 outbreak.

Mass vector control campaigns should be accelerated, ensuring protection for both health workers and communities against COVID-19 transmission. WHO and partners commend the leaders of Benin, the Democratic Republic of the Congo, Sierra Leone, Chad and for initiating ITN campaigns during the pandemic. Other countries are adapting their net distribution strategies to ensure households receive the nets as quickly and safely as possible. Preventive therapies for pregnant women and children must be maintained. The provision of prompt diagnostic testing and effective antimalarial medicines are also essential to prevent a mild case of malaria from progressing to severe illness and death.

The WHO and partners have developed guidance to ensure that those suffering from malaria can safely receive the care they need within the package of essential health services to be delivered in COVID-19 settings. Tailoring malaria interventions in COVID-19 response includes guidance on the prevention of infection through vector control and chemoprevention, testing, treatment of cases, clinical services, supply chain and laboratory activities. - TLTP

continued from page 8
economic and fiscal measures," said ADB President
Masatsugu Asakawa.

"ADB's timely support will help the government implement comprehensive measures to mitigate the devasting impact of COVID-19," said Indonesia's Minister of Finance and ADB Governor Sri Mulyani Indrawati. "We appreciate the speed of ADB's response and close engagement with the government to support the urgent needs of Indonesia."

The COVID-19 Active Response and Expenditure Support (CARES) Program will support the government's stimulus package geared to expand existing social assistance programs, boost resources for COVID-19 prevention and control, and safeguard productive sectors and workers from the economic downturn. The funding is coming from ADB's COVID-19 pandemic response option under the countercyclical support facility, which was introduced as part of a \$20 billion package approved by ADB on 13 April to assist its developing member countries in their fight against COVID-19 through quick disbursing budget support with affordable terms and condition.

Indonesia has been severely affected by the pandemic.

port with affordable terms and condition.

Indonesia has been severely affected by the pandemic. Critical public health measures to limit the spread of the disease have seriously disrupted economic activity, resulting in a sharp decline in forecasts for economic growth in 2020. Many Indonesians have been adversely affected by the economic downtum, especially the poor and vulnerable groups. ADB estimates that poverty could increase significantly, unless support measures can be effectively implemented. - TLTP

testing times under the pandemic, according to press statement issued by the Ministry of Economic Affairs. The President IDB thanked the minister for economic affairs and This would be achieved through a holistic approach aimed to accommodate priorities beyond the immediate and emergency Corona battle to last for long

ISLAMABAD: The head of the World Health Organization (WHO) has warned against complacency as countries continue to confront COVID-19 and citizens grow weary of stay-athome measures aimed at preventing the spread of the disease.

WHO chief Tedros Adhanom Ghebreyesus said that most countries are still in the very early stages of their epidemics, while some that had been affected earlier are now starting to see resurgence in cases.

"Make no mistake: we have a long way to go. This virus will be with us for a long time", he stated.

Todos told journalists that although lockdowns and physical distancing have helped suppress transmission in many countries, the virus remains "extremely dangerous". Most of the global population continues flowever, Tedros said moving forward will have to mean accepting "a new normal", and forging a world that is healthier, safer and better prepared. He underlined the six public health measures WHO has been advocating since the pandemic started, which centre around detection, isolation, testing, treatment and quarantine. "Countries that don't do these six central hings, and do them consistently, will see more cases, and more

People in countries with stay-athome orders are understandably
first frustrated with being confined to
their homes for weeks on end",
he said.

"People understandably want
lives will be lost", said Tedros.

"We also issued a call with the World Trade Organization, calling on countries to ensure the normal cross-border flow of vital medical supplies and other goods and services, and to resolve unnecessary disruptions to global supply chains", Tedros further said. "We need to ensure these products reach those in need quickly, and we emphasize the importance of regulatory cooperation and international standards."

dards."
"Stigma and discrimination are never acceptable anywhere at any time, and must be fought in all countries", he said, adding, "As I have said many times, this is a time for solidarity, not stigma". -TLTP
